Projects & Publications

Module 1: Flask Personal Website

A comprehensive portfolio website built with Flask, showcasing modern web development practices. This project demonstrates the implementation of a multi-page web application with blueprint-based architecture, responsive design, and clean code practices.

Key Features:

- Multi-page application with Flask blueprints
- Responsive HTML/CSS design
- Project showcase capabilities

Technologies Used: Python 3.10+, Flask, HTML5, CSS3, Jinja2 Templates
